OBJECTIVE

Python backend engineer with hands-on experience building automation systems, APIs, and data workflows in enterprise environments. Recently designed and deployed a production SLA-monitoring automation that replaced a 5x/day manual reporting process across a 3-shift team. Skilled in debugging production systems, translating business needs into technical solutions, and working across teams to ship reliable features. Pursuing AWS Certified Solutions Architect (Associate) to deepen cloud infrastructure skills. Seeking to contribute to backend or AI-powered engineering teams.

SKILLS

Python • SQL • REST APIs • FastAPI • PostgreSQL • Git • Bash • Data Analysis • Excel/Report Automation • Debugging • Cloud (OCI, AWS in progress) • Problem Solving • Communication

WORK EXPERIENCE

Analyst / Software Engineer — Cognizant Technology Solutions

- Designed and deployed a Python-based SLA breach alert automation (pandas, openpyxl) that eliminated a manual reporting process previously performed 5 times daily across 3 shifts, reducing manual effort and improving reporting consistency
- Developed Python-based backend workflows and API integrations supporting internal business applications
- Performed SQL-driven data analysis to improve reporting accuracy and operational efficiency
- Diagnosed and resolved production issues, improving system stability and workflow performance
- Collaborated with cross-functional stakeholders to translate business requirements into technical solutions

Technology Apprentice — Target Corporation

- Supported backend and data-related workflows under senior engineers
- Built Excel/data-driven process improvements to streamline internal operations
- Worked within agile environments, learning enterprise system workflows and delivery practices

PROJECTS

AMS SLA Breach Automation — github.com/Mirthinti/ams-sla-automation

- Designed and deployed a Python automation (pandas, openpyxl) that replaced a manual SLA breach reporting process previously run 5 times daily across a 3-shift team
- Built SLA-target parsing logic, breach-risk bucketing across time-to-breach categories, and a scheduled Excel + email reporting pipeline
- Deployed unattended via Windows Task Scheduler

Book Review API — github.com/Mirthinti/BookReviewAPI

- Built a REST API with Node.js, Express, and MongoDB supporting JWT authentication, CRUD operations, and middleware-based request handling

Online Examination System — github.com/Mirthinti/Online-Examination-System

- Built a web-based examination platform supporting user authentication, exam management, and result processing
- Implemented backend logic using Python and database integration for secure data handling

Data Analysis & Insights — github.com/Mirthinti/data-Analysis-and-Insights

- Performed data cleaning, analysis, and visualization to extract actionable insights using Python

EDUCATION

Bachelor in Computer Science — Parvathaneni Brahmayya Siddhartha College of Arts And Science	2022 – 2025
Sri Medha Junior College, Vijayawada, Andhra Pradesh	2019 – 2022

CERTIFICATIONS

- Oracle Cloud Infrastructure Certified Architect Associate — Oracle (2026)
- AWS Certified Solutions Architect – Associate (in progress)
- Google Associate Cloud Engineer (in progress)
- English Proficiency: CEFR C1 Advanced
